

VARIANT		
string	id	
string	assembly	
string	chromosome	
int	start_position	
int	end_position	
string	ref_allele	
string	alt_allele	
string	type	SNP / INDEL / etc

appears in (with allele freq)

is annotated with

DATASET	
string	id
string	name
string	assembly

COHORT	
string	id
string	name
int	size

VARIANT_ANNOTATION	
string	gene
string	consequence
string	clinical_significance

FILTERING_TERM	
string	id
string	label
string	ontology

includes (with genotype)

groups

filters / classifies

INDIVIDUAL	
string	id
string	sex
string	ethnicity
string	geographic_origin
list	diseases
list	phenotypic_features

provides

is analysed by

BIOSAMPLE	
string	id
string	tissue
string	sample_type
date	collection_date

ANALYSIS
